## **GPS SAFE** **SAFE GPS TRACKER**

### **Description**

Using the GSM and GPRS networks and a GPS satellite sensor, GPS SAFE can locate objects and persons anywhere on Earth with the simple use of a Smartphone.

GPS SAFE can be used in many different ways:

- **SATELLITE-BASED THEFT PREVENTION FOR MOTORCYCLES, CARS AND OTHER VEHICLES.**

When placed in a vehicle, after being suitably configured and activated, GPS SAFE will send a link via SMS if the vehicle is moved. When the link is clicked, a map is displayed showing the area and exact position of the vehicle.

When used on a motorcycle, the accidental movement sensor will send an alarm via SMS even if the motorcycle is only taken off its stand.

- **EMERGENCY ALARM**

The GPS SAFE has an SOS button that can be used to send an emergency alarm. When the SOS button is pressed, GPS SAFE will call 5 previously saved telephone numbers repeatedly until any of the 5 numbers picks up.

- **CHILD MONITOR**

When the device is placed in your child's back pack, it can tell you his or her exact position in real time with a simple SMS.

- **ANIMAL MONITOR**

When the device is placed on a collar or a saddle (horses), it can tell you the exact position of your animal in real time with a simple SMS.

- **AREA SECURITY**

With its remote audio monitoring feature, GPS SAFE allows you to listen to what is happening in the area where it has been placed.

- **LOCATING GROUPS**

Useful for knowing the position of work teams, excursionists, emergency squads, extreme sports enthusiasts, trekking fans, paragliders, etc.

- **TRACKING SHIPMENTS OF VALUABLES**

When properly hidden in goods that are being shipped, GPS SAFE can track the shipment in real time.

- **NO CONTRACT WITH AN OPERATIONS CENTER IS REQUIRED**

Just install an activated SIM card with enough credit for sending SMSs or placing calls.

## EXAMPLES OF USE

### Vehicle tracking and fleet Management

IPX7 Waterproof for motorcycle and bicycle

Accidental Movement Detection for security purpose

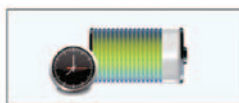

Micro-SD track logging and mileage control via software

### Asset guarding and tracking

Detection and Alert on accidental movements

Long stand-by time

Geo-fencing alerts on unexpected locations

### Monitoring and track recording of business trips

Trace and log business itinerary

Report location to administrator's phone

Record and manage paths via Track Manager software

### Portable emergency bell for elderly/kids care

Portable and waterproof two-way calling annunciator

Real-time tracking and report in case of emergency

Audio surveillance for prompt rescue

### Tracking of pets and animals

GPS and cell-tower positioning

IPX7-Waterproof for tracking in rigorous environments

Position report triggered remotely via administrator's phone

## Pack

### GPS SAFE

**Invoice description**  
GPS SAFE  
Safety satellite locator

**Packaging**  
GPS SAFE box

**Features**  
Euro slot

#### Package contents

- GPS SAFE
- USB cable
- Software CD
- Instruction

Article Code	EAN Code	Pack height	Pack width	Pack depth
GPSSAFE	8018080152146	17.5 cm	14.5 cm	7.5 cm

## GPS SAFE

### SAFE GPS TRACKER

- Built-in accidental movement sensor

- Built-in accidental movement sensor

- Remote-controlled locating functions via SMS

- Audio surveillance for immediate assistance

- GPS and GSM positioning for better determination of location

- Geo-fence alarm for protecting valuables

- Track Manager software to display changes in location on a map

- SOS emergency alarm with automatic phone calling

- Micro SD memory card for saving location changes

- IPX7 waterproof protection to allow placement in adverse environmental conditions

GPS SAFE can be recharged by using a permanent power supply system not included in the package. Contact an authorised retailer for further information.

**CBGPSSAFE**  
12V battery charger for GPSSAFE fixed installation

### Technical Specifications

- GSM band: 900/1800 MHz
- Battery: 900 mAh Li-Ion, rechargeable
- LED: charge - GPS - GSM - error
- Connection: Micro USB/USB 2.0
- Memory: 16 MB (expandable with Micro SD-SDHC)
- Dimensions: 6.98 cm x 4.85 cm x 1.98 cm
- Weight: 71 g
- IPX7 Waterproof
- Compatible with: PC running Windows 7, Vista, XP
