Matt felt these were quality, instantly liking the drawstring inner boots which gave him good comfort and confidence. He also liked the ratchet closure at the calf though this could have done with more adjustment for him. He liked them on the circuit – feel was good and he reckons the best here for leathers.

On the road, Jim also found them very comfortable with the inner liner and the ratchet leg-closure. Despite confidence-inspiring ankle bracing, articulation was fine and comfort was so good, he briefly forgot he was supposed to be rating them. They went under boot-cut jeans with no problems and felt neither hot nor cold while he found feel for the controls excellent. Also Vegan friendly.
